DETAILED ACTION

1. This application was withdrawn from issue and the applicants were notified about this action on May 12, 2003 (see paper no. 13).
2. Claims 1-9 and 12-20 are now pending in the application.

NEW GROUNDS OF REJECTION

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-9 and 12-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bogeso (U.S. Patent no. 4,650,884, cited on applicants form 1449).

Bogeso discloses novel intermediates and method for its preparation. In example 2 (see col. 5, line 33 to col. 6, line 5), Bogeso teaches a process for crystallizing citalopram hydrobromide. The process described by Bogeso is identical to the instant process and only differs from the instant process that it specifically does not mention controlling the cooling rate and furthermore, does not mention the particle size or aspect ratio of the crystals. However, Bogeso does teach preparing crystals of citalopram hydrobromide. Therefore, the applicants need to show the

Art Unit: 1625

beneficial effect of controlling the cooling rate on the size of crystals compared to the crystals obtained by Bogeso and furthermore, unexpected result of superior activity of the crystals obtained by the instant process over the crystals obtained by Bogeso since the utility of citalopram hydrobromide as an antidepressant is well known in the prior art.
